EPEsaver Rebate Center
1515 S Capital of Texas Hwy, Suite 110
Austin, TX 78746

Improve Your Comfort. Save Energy.

Solar screen and solar film rebates are available to El Paso Electric's Commercial Customers.

Solar screens are fit externally to the window frame and are partially transparent. They act to reduce the amount of direct sunlight entering the window and cut down overall glare without fully blocking the view or eliminating air flow. As a result solar screens help reduce cooling costs.

Solar films are retrofitted to the glass surface to help save on energy costs, maintain a more comfortable and productive environment, reduce interior fading and improve exterior appearance.

Check List

Incomplete applications **WILL NOT** be accepted. **Did you include?**

- A copy of Receipt or Invoice
- Product Specification Sheet
- Pre and Post Installation Pictures
- Complete Installation Information
- Complete Interior Shading Information
- Complete and Verify EPE Account Information:
 - Name on Account
 - Account Number
 - Service Address
 - Mailing Address

v. 4.18.18

El Paso Electric

Commercial Window Treatment Rebate Program

New Mexico

Improve Comfort. Save Energy.

El Paso Electric's Commercial Customers have the opportunity to participate in the EPESaver Window Treatment Rebate Program. Rebates are available for solar screen or film installation projects that can reduce energy consumption.

Solar screens and solar films are proven low-cost methods for reducing cooling energy costs. They allow daylight to enter a building while reducing the solar heat transmitted into the building.

The Knowledge You Need.

Commercial Customers are eligible to receive **\$1.00/SqFt** rebate for solar screen and solar film installation.

- Solar screens and solar films must be installed on the **West** and **South** facing glass.
- Space must be cooled by **refrigerated air conditioning** (DX or Chilled Water) and heated by gas or heat pump.

The preexisting conditions cannot apply:

- Low E Windows
- Existing Solar Film or Solar Screens
- Exterior Awnings or Curtains
- Exterior Overhangs

Rebate Calculation Example:

A facility has installed 500 square feet of solar screens on West and South facing sides of the building:

SqFt of Window Treated	Rebate Amount/SqFt	Estimated Rebate
500	\$1.00/SqFt	500 x \$1.00 = \$500

Rebates are issued on a first come basis until funding is exhausted or program is changed. All rebates are subject to approval by EPE's Program Manager.

Product Eligibility.

Solar Screens

- Must block a minimum of 70% solar heat.
- Installed on the exterior of the window.

Solar Film

- Solar heat gain coefficient of less than 0.50.
- Must meet all applicable codes and ASTM Standards.

Participation Made Easy.

1. Select a Product
2. Take Pre Pictures
3. Install Your Product
4. Take Post Pictures
5. Submit **Completed Rebate Application** to the **EPESaver Rebate Center** with the following:

a. Invoice or Receipt*

b. Pre & Post Pictures

c. Product Specification Sheet

6. Receive rebate in 4-6 weeks.

*All invoices must clearly indicate the type of treatment installed, the brand of product purchased and the total cost for materials and installation.
