

2018 EPESaver Residential Duct Efficiency Rebate Program

Improve Your Comfort. Save Energy.

New Mexico

CHECKLIST

Incomplete rebate forms will **NOT** be accepted. Did you:

- Include a copy of your dated receipt or contractor invoice that details all of the installed duct work?
- Include your EPE account #?
- Complete all customer and installed equipment information?
- Sign and date the rebate?

Did you know that on average 15% of cooling energy is wasted due to duct leakage? Over time duct work fittings may have come loose, become disconnected, or may have been poorly sealed when they were initially installed. These factors lead to high electrical bills for heating and cooling air that leaks from the duct work into the attic or unconditioned space.

Note: To be eligible for a rebate, the home **MUST** be cooled by refrigerated air. New construction projects are **NOT** eligible to receive a rebate. Photos of pre and post pressurization readings are also required in order to be eligible to receive a rebate.

The Knowledge You Need.

Leaky ducts can be repaired by sealing them with readily available sealants. Duct sealing is a cost effective way to improve the efficiency of your heating and cooling equipment.

Energy savings for treated duct systems are calculated based on the reduction of air leakage. The pre- and post-installation duct leakage must be measured by a rater or contractor using a combined blower door and duct pressurization method. Simply put, this test will pressurize your duct system and take a reading of how much air is leaking from your ducts before and then after your ducts are repaired.

Pre-CFM values will be capped at 35% of total fan flow, estimated as 400 CFM per ton using the cooling tonnage rounded to the nearest half ton. Post-CFM values must be less than or equal to 10% of total fan flow.

Once the pre- and post-installation duct leakage is measured, the rebate amount for the duct improvements can be calculated using an online calculator tool. To access the tool go to the following link: www.epelectricefficiency.com/ducttool/152helper.aspx.

The online calculator will calculate the rebate amount based on the reduction of leakage to the system.

Participation Made Easy.

Your contractor can assist you in completing your rebate form.

1. Select a contractor of your choice.
2. Once the contractor has completed the duct work, including a pre- and post-pressurization test, the EPESaver Duct Efficiency rebate form may be completed online or mailed along with a copy of your receipt or invoice to the rebate processing center address. Additional copies of the rebate form can be downloaded at www.epesaver.com.
3. Your rebate will be mailed directly to you from EPE. Rebate checks will be mailed within 4–6 weeks of receiving the rebate form.
