

El Paso Electric

# 2018 EPESaver Residential Evaporative Cooling Rebate Program

Improve Your Comfort. Save Energy.

New Mexico

**Did you know that evaporative air conditioning systems use less electricity and are less expensive to install and maintain than refrigerated air conditioning?** In hot, dry climates evaporative cooling is a cost effective and energy efficient way to cool your home.

The EPESaver Evaporative Cooling Rebate Program provides rebates to residential customers that install eligible evaporative cooling systems.

A rebate will only be paid for a qualifying model and must meet the following requirements:

- Be permanently installed (window units **not** eligible)
- Evaporative Air Conditioners **must** be on the EPE approved list in order to be eligible to receive a rebate. To view the eligibility list, visit [www.epesaver.com](http://www.epesaver.com).
- Have a single duct or multi-ducted distribution system (portable units **not** eligible).

**NOTE:** New construction projects are NOT eligible to receive a rebate. Limit of 1 rebate per household per year. Must be a New Mexico residential customer and property must be classified as residential on the electric service bill.

Applications for apartment complexes/rental property management will need to be PRE-APPROVED through the Energy Efficiency Department prior to the start of the project to be eligible and will be limited to a maximum of 10 rebates annually with a limit of one rebate per household. Properties must be separately metered and classified as residential on the electric service bills. Pre and post photos of the multiple units would need to be included with these applications.

## CHECKLIST

Incomplete rebate forms will **NOT** be accepted. Did you:

- Include a copy of your dated receipt or contractor invoice that details all installed equipment information, including brand, model # and serial #?
- Include your EPE account #?
- Complete all customer and installed equipment information?
- Sign and date the rebate?

## The Knowledge You Need.

An evaporative cooler is essentially a large fan with water-moistened evaporative pads in the air stream. The fan draws warm outside air through the pads and blows the now-cooled air throughout the house.

Refrigerated air conditioning is a closed system, taking air from inside a house and recycling it. For refrigerated air conditioning to function properly, doors and windows should be closed. Evaporative cooling is an open system and takes air from outside the house. For evaporative cooling to work properly, the cooled air must flow freely throughout the area to be cooled. By choosing which doors or windows in your home to leave open, you can direct the flow of cooled air to areas where cooling is needed.

## Participation Made Easy.

1. Select a contractor of your choice.
2. Customers may also elect to pursue an EPESaver Evaporative Air Cooling rebate without the help of a contractor.
3. Purchase a unit that is listed on the EPESaver Evaporative Cooler Eligibility List. To view the eligibility list, visit [www.epesaver.com](http://www.epesaver.com).
4. Once a new eligible evaporative air conditioning unit has been installed, the EPESaver Evaporative Air Cooling rebate form may be completed online or mailed along with a copy of your receipt or invoice to the rebate processing center address. Additional copies of this form can be downloaded from the EPESaver website at [www.epesaver.com](http://www.epesaver.com).
5. Your rebate will be mailed directly to you from EPE. Rebate checks will be mailed within 4–6 weeks of receiving the rebate form.

### Rebate for Eligible Evaporative Cooling Units\*

Only Eligible Models from EPESaver List with Saturation Effectiveness >85%	\$600/unit Rebate
--	-------------------

\* Rebate will not exceed the total a customer paid for a qualifying model.

**Rebates are issued on a first come, first served basis until funding is exhausted or the program is changed. All rebates are subject to approval by EPE's Program Manager. Incentive levels are subject to change at any time.**

**Limit of 1 rebate per household per year. Applications for apartment complexes will be limited to receive a maximum of 1 rebate annually. Property must be separately metered and classified as residential on electric service bill. Must be a New Mexico residential customer to qualify.**
