

El Paso Electric

# 2018 EPESaver Residential Solar Screens Rebate Program

Improve Your Comfort. Save Energy.

New Mexico

## CHECKLIST

Incomplete rebates will **NOT** be accepted. Did you:

- Include a copy of your dated receipt or contractor invoice that details all of the installed solar screens?
- Include your EPE account number?
- Complete all customer and installed equipment information?
- Sign and date the rebate?

El Paso Electric’s residential customers have the opportunity to participate in the EPESaver Solar Screens Rebate Program. Rebates are available for residential customer solar screen installations.

Solar screens are a proven low-cost method for reducing cooling bills. They allow daylight to enter a building while blocking solar heat gains.

**Note:** Only available to spaces conditioned by refrigerated air and heated with gas or heat pump heating. Households or buildings with electric resistance heat do not qualify for this rebate. New construction is **NOT** eligible to receive a rebate.

## The Knowledge You Need.

Residential customers are eligible to receive a rebate for the installation of solar screens. Rebates are only paid for installations occurring on **West** and **South** facing windows.

The rebate for solar screens is \$1.00 per square foot of West or South facing window space treated.

**Residential Customers** installing solar screens must meet the following criteria to be eligible for a rebate:

- The screens installed must be rated to **block at a minimum 70% of solar heat.**
- Solar screens must be **installed on the exterior of the window.**
- **Must be installed on windows where the interior space is conditioned by refrigerated air conditioning. ONLY** available to homes with gas or heat pump heating.
- Customers installing solar film are not eligible to receive a rebate.

Be sure to review the program requirements before purchasing and installing solar screens, as EPE will not pay incentives for treatments that do not meet the eligibility requirements.

**Rebate Calculation Example:** A house or facility has installed 500 square feet of solar screens on West and South facing sides of the building:

SqFt of Solar screens	Rebate Amount/SqFt	Estimated Rebate
500	\$1.00/SqFt	500 x \$1.00 = \$500

## Participation Made Easy.

1. Select a contractor of your choice.
2. Customers may also elect to pursue an EPESaver Solar Screens rebate without the help of a contractor.
3. Once the new solar screens have been installed, the EPESaver Solar Screens rebate form may be completed online or mailed along with a copy of your receipt or invoice to the rebate processing center address. Additional rebate forms can be downloaded from the EPESaver website at [www.epesaver.com](http://www.epesaver.com).
4. Your rebate will be mailed directly to you from EPE. Rebate checks will be mailed within 4–6 weeks of receiving the rebate form.

**Rebates are issued on a first come, first served basis until funding is exhausted or program is changed. All rebates are subject to approval by EPE’s Program Manager.**

Also, all invoices must clearly indicate the type of treatments installed, the primary direction (only West and South facing treatments are eligible) of the windows that solar screens are installed on, the brand of product purchased and the total cost for materials and installation.
